EXAMINER'S COMMENT

DRAWINGS

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the lines are blurred, not clear in each of the figures. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record fail to teach a needle having a uniform stress level throughout its length wherein the needle central section having uniform transverse cross-sectional profile and the distal end having a parabolic surface profile and wherein the surface profile is defined by the equation $d = (((32W)/(\pi\alpha)) * (X_n))^{1/3}$. See specification for variables. The prior art of record is silent as to the surface profile of the parabolic surface.

For these reasons, the examiner believes the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
